

Adviser to the Hon'ble Prime Minister  
Government of the People's Republic of Bangladesh

New Technologies and Ideas are prerequisite to sustainable development. POWER - Bangladesh 2009 is showcasing new and cutting edge technologies in the Power industry through their 2009 International Expo. I believe this would provide our industry stakeholders with opportunities to explore latest technology and industry best practices.

We need to find innovations from the global power industry that will suit our indigenous environment, meet long-term requirements and help us best prepare for the challenges of the upcoming regime of climate change and such other global concerns. Our success will also depend on identifying and harnessing matching technology solutions. This type of event is one of the best ways to find out such solutions. I congratulate the organizers and patrons of the event for taking this timely initiative and hope that this 'single roof' will be able to cater to the multifarious needs of the Bangladesh power sector.

I welcome the International participants of the Exhibition to Bangladesh and wish all success to the 'POWER Bangladesh 2009 International Expo'.

Tawfiq-e-Elahi Chowdhury, BS
